

Happy SPRING !!

Spring 2025 is knocking early at our door’s this year.

A special thanks to our industry, who once again take full responsibility for sustainable food production, also in the Netherlands, farmers are busy. The first cows have already gone outside, the land is being prepared, crops are being sown. Nature is also showing itself in full force and the blossoms make us extra happy. Spring is therefore an inspiring season, a season overflowing with energy and representing change and new opportunities.

On behalf of the AG Associates Group, let the spring come, we can't wait.
